SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Changes in Patent and Trademark Assignment Practice

Agency: :Patent and Trademark Office, Commerce
Action:: Notice of Proposed Rulemaking
Summary :The Patent and Trademark Office (Office) proposes amendments to the rules of practice regarding assignments in patent and trademark cases to improve and clarify the rules, to codify changes in practice and to consolidate the rules. The Office proposes to combine the assignment rules currently in Parts 1 and 2 into a new Part 3 directed to assignments.
Dates:: Written comments must be received on or before July 9, 1991, to ensure consideration. A public hearing will be conducted in TWO CRYSTAL PARK, Suite 912, at 2121 Crystal Drive, Arlington, Virginia, beginning at 9:00 a.m. on July 17, 1991. Requests to present oral comments should be received on or before July 10, 1991.
Address: Address written comments to the Office of the Deputy Assistant Commissioner for Patents, Commissioner of Patents and Trademarks, Box DAC, Washington, D.C. 20231, marked to the attention of Jeffrey V. Nase. Written comments will be available for public inspection in Suite 912, on the 9th floor of TWO CRYSTAL PARK, located at 2121 Crystal Drive, Arlington, Virginia.
For Further Information Contact: Jeffrey V. Nase by telephone at (703) 557-4282 or by mail marked to his attention and addressed to Commissioner of Patents and Trademarks, Box DAC, Washington, D.C. 20231.
Supplementary Information:: The Office is proposing to amend the rules of practice in patent and trademark cases to revise, simplify, remove or clarify existing assignment rules or to codify certain practices which are currently in effect. Changes are proposed for rules relating to the documents that will be recorded; the requirements for recording a document; the effect of recording; new cover sheet requirements; the appointment of domestic representatives; and prosecution by assignees and issuance to assignees. While the present rules do not require a cover sheet to accompany each document submitted for recording, typically a cover letter is submitted to ensure proper processing of the document.

The Office has suggested and encouraged the public to use a cover letter, containing specific information concerning the document being submitted, with each document submitted for recording; see "Helpful Hints", 1114 *Official Gazette* 77 (May 29, 1990). The public has adopted the suggested procedure to such an extent that most documents now submitted for recordation are accompanied by a cover letter which contains the suggested data. Documents submitted for recording with cover sheets containing the specific information needed for recordation have enabled the Office to greatly improve the quality and efficiency of the recording process. To better ensure that the correct data is captured in recordation and recorded promptly, the Office is proposing to make a cover sheet mandatory. The proposed cover sheet will contain all the information necessary for the Assignment Branch to properly and promptly process the document.

Specific Rules Proposed to be Deleted or Added:: The existing rules of practice in Parts 1 and 2 of Title 37 of the Code of Federal Regulations which are proposed to be deleted are §§ 1.32, 1.331, 1.332, 1.333, 1.334, 2.185, 2.186 and 2.187. These rules are proposed to be deleted in their entirety and rewritten and renumbered under a proposed new Part 3. Table 1 is provided to assist readers in correlating present rules with the proposed rules.

Consideration was given to moving § 1.12 (Assignment records open to public inspection.) to proposed new Part 3. However, since this section primarily relates to records maintained by the Office and procedures for accessing those records, a tentative decision has been made to retain this section under the general heading "Records and Files" of the Patent and Trademark Office. Comments are requested on whether § 1.12 should be retained in Part 1, or moved to proposed Part 3.

Discussion of Specific Sections Proposed to be Changed or Added: Section 1.12(a) is proposed to be revised to reflect the fact that all assignment records related to pre-1955 trademark records and pre-1957 patent records were transferred to the National Archives and Records Administration (NARA) during 1990. All assignments recorded on or after January 1, 1955, for trademarks and May 1, 1957, for patents continue to be maintained by the Office. The pre-1955/1957 records have been transferred to NARA to allow for greater accessibility to the public, improvement of file integrity for the older records, and preservation of these materials. The pre-1955/1957 assignment cards, digest books, and libers were stored in four locations: the Assignment Search Room (ASR) at the Office, the Federal Records Center, the National Archives in downtown Washington, and the National Archives location in Alexandria. Storage of information in these various locations made searching of old assignment records difficult. The materials located at the Federal Records Center could be ordered from the ASR. However, many times it took months to receive the materials.

All assignment records from 1837 to December 31, 1954, for trademarks and from 1837 to April 30, 1957, for patents are maintained and are open for public inspection in the National Archives Research Room located at the Washington National Records Center Building, 4205 Suitland Road, Suitland, Maryland 20746. Assignments recorded before 1837 are maintained at the National Archives and Records Administration, 941 South Pickett Street, Alexandria, Virginia 22304.

All requests for abstracts of title continue to be provided by the Office upon request and payment of fees set forth in §§ 1.19 and 2.6. Requests for copies and certified copies of the pre-1955 records for trademarks and pre-1957 records for patents should be directed to NARA since those records are not maintained by the Office. Since these record are maintained by NARA, it becomes more expeditious to request copies directly from NARA, rather than the Office, which would then have to route the requests to NARA. Payment of the fees required by NARA should accompany all requests for copies.

Another proposed change is to make clear that separate assignment records are kept for patents and trademarks, and to indicate that an extra charge will be imposed by the Office on requests for copies of recorded assignments if the correct reel and frame number are not identified.

Sections 1.17 and 1.46 are proposed to be amended to make reference to proposed § 3.81, which would replace § 1.334, and delete reference to § 1.334. The amount of the fee for recording

a document would not be affected by this proposed rule change.

Section 1.104(e) is proposed to be amended to make reference to proposed Part 3, which would replace § 1.331, and delete reference to § 1.331.

Section 3.1 is proposed to be added to set out definitions of terms used in proposed Part 3. Terms which are defined include "application," "assignment," "document," "Office" (meaning Patent and Trademark Office), "recorded document," and "registration." Definitions are provided to make clear the intended meanings of the terms used in proposed Part 3. These definitions are intended to be applicable only to proposed Part 3. For example, the term "application" is defined, for the purpose of proposed Part 3, to mean either an application for patent or an application to register a trademark, unless otherwise indicated.

Section 3.11 is proposed to replace and modify the practice set forth in §§ 1.331(a) and 2.185(a), which specify the documents the Office will record. This proposed section specifies that assignments of patents and registrations will be recorded, as well as other documents which affect title to applications, registrations and patents. Proposed § 3.11 would require that a completed cover sheet as specified in proposed §§ 3.28 and 3.31 be submitted with the document to be recorded.

Section 3.16 is proposed to be added to incorporate the limitation set out in 15 U.S.C. § 1060 proscribing the assignment of an intent-to-use trademark application prior to the filing of a statement of use, except as a part of the sale of an on-going business. Because the proposed amendments to Part 3 are intended to address all rules relating to assignments, it is appropriate to refer to the statutory requirements of an assignment of an intent-to-use trademark application.

Section 3.21 is proposed to replace and modify the practice of § 1.331(c). Proposed § 3.21 sets forth requirements for the recording of assignments of patents or patent applications. An assignment relating to a patent must identify the patent by number. The name of the inventor, the issue date and title of the invention as stated in the patent may also be given in the assignment to provide additional information on the patent being assigned. An assignment relating to a national patent application must identify the national patent application by application number (consisting of the series code and the serial number, e.g., 07/123,456) or serial number and filing date. An assignment relating to an international patent application which designates the United States of America must identify the international application number (e.g., PCT/US90/01234). The name of the inventor, date of filing and title of the invention as stated in the patent application may also be given in the assignment. If an assignment is executed concurrently with, or subsequent to, the execution of the patent application, but before the patent application is filed, it must identify the patent application by its date of execution, name of each inventor, and title of the invention so that there can be no mistake as to the patent application intended. Assignments submitted for recording that do not identify the patent or patent application as required by this section will not be recorded, but will be returned to the correspondence address which would be required to be provided on the cover sheet by proposed § 3.31(e).

Section 3.24 is proposed as a new section to set forth formal document requirements aimed at facilitating and expediting the recording process. This section proposes that documents submitted for recording be legible, using only one side of each page. The paper used should be bond weight paper, preferably no larger than 8 1/2 x 14 inches (21.6 x 33.1 cm.), and with a one-inch (2.5 cm.) margin on all sides. Documents submitted in this form are camera-ready and can be recorded expeditiously with little additional handling required. Documents submitted that fail to meet the legibility and only-one-side-of-the-paper requirements of this proposed section will be returned as set forth in proposed § 3.51.

Section 3.26 is proposed to replace and modify the practice of §§ 1.331(b) and 2.185(a)(2). Proposed § 3.26 provides that the Office will accept and record non-English documents provided they are accompanied by a verified English translation signed by the translator. Documents submitted that fail to meet the requirements of this proposed section will be returned as set forth in proposed § 3.51.

Section 3.27 is proposed as a new section to set forth how documents submitted for recording should be addressed to the Office. To ensure prompt and proper processing, documents and their cover sheets should be addressed to the Commissioner of Patents and Trademarks, Box Assignments, Washington, D.C. 20231, unless they are filed together with new applications or with a petition under § 3.81(b). Petitions under § 3.81(b) should be addressed to the Commissioner of Patents and Trademarks, Box DAC, Washington, D.C. 20231. New applications and other petitions should be addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Section 3.28 is proposed as a new section to set forth a new requirement aimed at facilitating and expediting the recording process. This section would require that all requests to record a document in the Office be accompanied by the document to be recorded and at least one cover sheet referring either to the patent applications and patents or to the trademark applications and registrations against which the document is to be recorded. Only one set of documents and cover sheets to be recorded should be filed. If a document to be recorded includes interests in, or transactions involving, both patents and trademarks, separate patent and trademark cover sheets must be submitted. If a document to be recorded is not accompanied by a completed cover sheet, the document and any incomplete cover sheet will be returned to the correspondence address for proper completion of the cover sheet and resubmission of the cover sheet and document. While the present rules do not require a cover sheet to accompany each document submitted for recording, typically a cover letter is submitted to ensure proper processing of the document. The Office is proposing to make a cover sheet mandatory in order to better ensure prompt and proper processing of all documents submitted for recording. The proposed cover sheet will contain all the information necessary for the Office to process the document.

Section 3.31 is proposed as a new section to set forth the formal requirements of the new cover sheet. This section proposes that each patent or trademark cover sheet must contain (1) the name of the party conveying the interest; (2) the name and address of the party receiving the interest; (3) a brief description of the interest conveyed or transaction to be recorded (e.g., assignment, license, change of name, merger, security agreement, etc.); (4) each application number, patent number or registration number against which the document is to be recorded, or an indication that the document is filed together with a patent application; (5) the name and address of the party to whom correspondence concerning the request to record the document should be mailed; (6) the number of applications, patents or registrations identified in the cover sheet and the total fee; (7) the date the document was executed; (8) an indication that the assignee of a trademark application or registration who is not domiciled in the United States has designated a domestic representative; and (9) the signature of the party submitting the document and verification of the correctness of information contained on the cover sheet. The verification must be in oath or declaration form unless (1) the submitted documents pertain only to patents and patent applications and the cover sheet is signed by a registered practitioner, or (2) the submitted documents pertain only to trademark applications and registrations and the cover sheet is signed by an attorney as defined in § 10.1(c). Sample cover sheets for patent documents and for trademark documents are shown in Appendices A and B.

Section 3.34 is proposed as a new section to set forth a procedure to correct errors in a recorded cover sheet. This section proposes that if a recorded cover sheet contains an error that is apparent when the cover sheet is compared with the recorded document, the error will be corrected only if a corrected cover sheet is filed for recordation. The corrected cover sheet must be accompanied by the originally-recorded document or a copy of the originally-recorded document and by a new assignment recording fee in the appropriate amount.

Section 3.41 is proposed to replace and consolidate practice under §§ 1.331(a) and 2.185(a)(3) regarding recording fees. Proposed § 3.41 would require that all requests to record documents be accompanied by the appropriate fee. A fee is charged for each application, patent and registration identified in the cover sheet. The recording fee for patents and patent applications is specified in § 1.21(h). The recording fee for registrations and trademark applications is specified in § 2.6(q).

Section 3.51 is proposed to replace and modify the practice of §§ 1.332 and 2.185(c). Proposed § 3.51 would set the date of recording of a document as the date the document meeting the requirements for recording set forth in this Part is filed in the Office. A document which does not comply with the identifica-

tion requirements of § 3.21 will not be recorded. Other documents not meeting the requirements for recording, for example, a document submitted without a completed cover sheet, without the required fee, or without any required translation will be returned for correction to the sender where a return address is available. The returned papers would be accompanied by a letter which would indicate that if the returned papers are corrected and resubmitted to the Office within the time specified in the letter, the Office would consider the original date of filing of the papers as the date of recording of the papers. Applicants could use the certificate procedure under either § 1.8 or § 1.10 for resubmissions of returned papers if they desired to have the benefit of the date of deposit in the United States Postal Service. If the returned papers were not corrected and resubmitted within the specified period, the date of filing of the corrected papers would be considered to be the date of recording of the papers. Extensions of time would not be available to extend the specified period to resubmit the returned papers.

Section 3.54 is proposed as a new section to set forth the effect of recording a document. This proposed section would set forth that the recording of a document is not a determination by the Office of the validity of the document or the effect that document has on the title to an application, a patent, or a registration. The Office will determine, when necessary, what effect a document has, including whether a party has the authority to take an action in a matter pending before the Office. Examples of when the Office will need to determine whether a party has the authority to take an action in a matter pending before the Office include: (1) prosecution by the assignee as in proposed § 3.71; (2) consent of an assignee to the filing of a reissue application as provided in § 1.172; and (3) execution of a disclaimer under § 1.321 by an assignee.

Section 3.56 is proposed to replace and modify the practice of § 1.333. proposed § 3.56 provides that an assignment, which at the time of its execution is conditional on a given act or event, will be treated by the Office as an absolute assignment. This section serves as notification as to how a conditional assignment will be treated by the Office in any proceeding requiring a determination of the owner of an application, patent or registration. Since the Office will not determine whether a condition has been fulfilled, the Office will treat the submission of such an assignment for recordation as signifying that the act or event has occurred.

Section 3.61 is proposed to replace and modify the practice of § 2.185(a)(4). Proposed § 3.61 sets forth that an assignee of a trademark application or registration not domiciled in the United States must designate a domestic representative in writing to the Office. Assignees of patent applications or patents may designate domestic representatives if the assignee is not residing in the United States. 35 U.S.C. 293. The designation would be required to state the name and address of a person residing within the United States on whom may be served process or notice of proceedings affecting the application, patent or registration or rights thereunder.

Section 3.71 is proposed to replace and modify the practice of §§ 1.32 and 2.186. Proposed § 3.71 sets forth that the assignee of record of the entire right, title and interest in an application for patent is entitled to conduct the prosecution of the patent application to the exclusion of the named inventor. Similarly, the assignee of record of the entire right, title and interest in an application for registration is entitled to conduct the prosecution of the trademark application to the exclusion of the applicant.

Section 3.73 is proposed as a new section to set forth the procedure by which an assignee can establish the right to take action in an application, patent or registration. The inventor is presumed to be the original owner of a patent application and any patent that may issue therefrom, unless there is an assignment. The original applicant is presumed to be the original owner of a trademark application and any registration that may issue therefrom, unless there is an assignment. Any action before the Office with respect to an assigned application, patent, or registration may be taken by the assignee of the entire right, title, and interest, provided ownership is established to the satisfaction of the Commissioner. The assignee may establish ownership by submitting to the Office documentary evidence of a chain of title from the original owner to the assignee or by specifying (e.g., reel and frame number, etc.) where such evidence is recorded in the Office. Additionally, a statement signed by the party seeking to take action in a matter pending before the Office or its attorney or agent of record must also be submitted stating the evidence has been reviewed and certifying that, to the best of the party's, attorney's, or agent's knowledge and belief, title is in the party seeking to take the action. Documents submitted to establish ownership may be required to be recorded in the Office as a condition to permitting the requesting party to take action in a matter pending before the Office.

Section 3.81 is proposed to replace and modify the practice of § 1.334. Proposed § 3.81 would set forth the procedure for issuance of a patent to an assignee. If an assignment of the entire right, title, and interest is recorded before the issue fee is paid for a patent application, the patent may issue in the name of the assignee. If the assignee holds an undivided part interest, the patent may issue jointly to the inventor and the assignee. At the time the issue fee is paid, the name of the assignee must be provided if the patent is to issue solely or jointly to that assignee. If the assignment is submitted for recording after the date of payment of the issue fee, but prior to issuance of the patent, the assignee may petition that the patent issue to the assignee. Any such petition must be accompanied by the fee set forth in § 1.17(i)(1).

Section 3.85 is proposed to replace and modify the practice of § 2.187. Proposed § 3.85 would set forth the procedure for issuance of a registration to an assignee. The certificate of registration may be issued to the assignee of the applicant, or in a new name of the applicant, provided that the party files a written request in the trademark application record by the time the application is being prepared for issuance of the certificate of registration, and an appropriate document is recorded in the Office. If the assignment or name change document has not been recorded in the Office, then the written request must state that the document has been filed for recordation. The address of the assignee must be made of record in the trademark application file.

Other Considerations

The proposed rule changes are in conformity with the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), Executive Orders 12291 and 12612 and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that these proposed rule changes will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)). The principal impact of these proposed changes is to require that a cover sheet accompany each document submitted for recording. The rule change includes no additional or increased fees. Substantive rights to use trademarks and patents are not adversely affected.

The Office has determined that these proposed rule changes are not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. Because most of the proposed changes reduce procedural burdens, there will be no major increase in costs or prices for consumers; individual industries; Federal, state or local government agencies; or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

These proposed rule changes contain a collection-of-information requirement subject to the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* The proposed rule changes add a requirement for a cover sheet to be submitted with each document to be recorded that will expedite the recording process and improve quality. The public reporting burden for this requirement is estimated to be *one-half* hour per filing, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collections of information. Send comments regarding the burden estimate or any other aspect of these collections of information, including suggestions for reducing this burden, to the Commissioner of Patents and Trademarks, Attention: Office of Management and Organization, Washington, D.C. 20231; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, Attention: Paperwork Reduction Projects 0651-0009 and 0651-0011.

The Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

For purposes of this part, the following definitions shall apply:

Application means an application for patent or an application to register a trademark unless otherwise indicated.

Assignment means a transfer by a party of all or part of its right, title and interest in a patent or patent application, or a transfer of its entire right, title and interest in a trademark application or registration.

Document means a document which a party requests to be recorded in the Office pursuant to § 3.11 and which affects some interest in an application, patent, or registration.

Office means the Patent and Trademark Office.

Recorded document means a document which has been recorded in the Office pursuant to § 3.11.

Registration means a trademark registration issued by the Office.

Documents Eligible for Recording

§ 3.11 Documents which will be recorded.

Assignments of applications, patents, and registrations, accompanied by completed cover sheets as specified in §§ 3.28 and 3.31, will be recorded in the Office. Other documents, accompanied by completed cover sheets as specified in §§ 3.28 and 3.31, affecting title to applications, patents, or registrations, will be recorded as provided in this Part or at the discretion of the Commissioner.

§ 3.16 Assignability of trademark prior to filing of use statement.

No application to register a mark under 15 U.S.C. 1051(b) is assignable prior to the filing of the verified statement of use under 15 U.S.C. 1051(d) except to a successor to the business of the applicant, or portion thereof, to which the mark pertains, if that business is ongoing and existing.

Requirements for Recording

§ 3.21 Identification of patent or patent application.

An assignment relating to a patent must identify the patent by the patent number. An assignment relating to a national patent application must identify the national patent application by the application number (consisting of the series code and the serial number, e.g., 07/123,456) or the serial number and filing date. An assignment relating to an international patent application which designates the United States of America must identify the international application by the international application number (e.g., PCT/US90/01234). If an assignment is executed concurrently with, or subsequent to, the execution of the patent application, but before the patent application is filed, it must identify the patent application by its date of execution, name of each inventor, and title of the invention so that there can be no mistake as to the patent application intended.

§ 3.24 Formal requirements for document and cover sheet.

The document and cover sheet must be legible. Only one side of each page shall be used. The paper used should be bond weight paper, preferably no larger than 8 1/2 x 14 inches (21.6 x 33.1 cm.), and with a one-inch (2.5 cm.) margin on all sides.

§ 3.26 English language requirement.

The Office will accept and record non-English language documents only if accompanied by a verified English translation signed by the individual making the translation.

§ 3.27 Mailing address for submitting documents to be recorded.

Documents and cover sheets to be recorded should be addressed to the Commissioner of Patents and Trademarks, Box Assignments, Washington, D.C. 20231, unless they are filed together with new applications or with a petition under § 3.81(b).

§ 3.28 Requests for recording.

All requests to record a document in the Office must be accompanied by the document to be recorded and at least one cover sheet as specified in § 3.31 referring either to each patent application and patent, or to each trademark application and registration, against which the document is to be recorded. If a document to be recorded includes interests in, or transactions involving, both patents and trademarks, separate patent and trademark cover sheets must be submitted. Only one set of documents and cover sheets to be recorded should be filed. If a document to be recorded is not accompanied by a completed cover sheet, the document and any incomplete cover sheet will be returned pursuant to § 3.51 for proper completion of a cover sheet and resubmission of the document and a completed cover sheet.

Cover Sheet Requirements

§ 3.31 Cover sheet content

Each patent or trademark cover sheet required by § 3.28 must contain:

(a) the name of the party conveying the interest;

(b) the name and address of the party receiving the interest;

(c) a description of the interest conveyed or transaction to be recorded;

(d) each application number, patent number or registration number against which the document is to be recorded, or an indication that the document is filed together with a patent application;

(e) the name and address of the party to whom correspondence concerning the request to record the document should be mailed;

(f) the number of the applications, patents or registrations identified in the cover sheet and the total fee;

(g) the date the document was executed;

(h) an indication that the assignee of a trademark application or registration who is not domiciled in the United States has designated a domestic representative (see § 3.61); and

(i) the signature of the party submitting the document and verification of the correctness of information contained on the cover sheet. The verification must be in oath or declaration form unless:

(1) the submitted patent cover sheet is signed by a registered practitioner, or

(2) the submitted trademark cover sheet is signed by an attorney as defined in § 10.1(c).

A cover sheet may not refer to both patents and trademarks.

§ 3.34 Correction of cover sheet errors.

An error in a cover sheet recorded pursuant to § 3.11 will be corrected only if:

(a) the error is apparent when the cover sheet is compared with the recorded document to which it pertains and

(b) a corrected cover sheet is filed for recordation. The corrected cover sheet must be accompanied by the originally-recorded document or a copy of the originally- recorded document and by an assignment recording fee as set forth in § 1.21(h) of this Chapter for patents and § 2.6(q) of this Chapter for trademarks.

Fees

§ 3.41 Recording fees.

All requests to record documents must be accompanied by the appropriate fee. A fee is required for each application, patent and registration against which the document is recorded as identified in the cover sheet. The recording fee is set in § 1.21(h) of this Chapter for patents and in § 2.6(q) of this Chapter for trademarks.

Date and Effect of Recording

§ 3.51 Recording date.

The date of recording of a document is the date the document meeting the requirements for recording set forth in this Part is filed in the Office. A document which does not comply with the identification requirements of § 3.21 will not be recorded. Documents not meeting the other requirements for recording, for example, a document submitted without a completed cover sheet or without the required fee, will be returned for correction to the sender where a correspondence address is available. The returned papers will be accompanied by a letter which will indicate that if the returned papers are corrected and resubmitted to the Office within the time specified in the letter, the Office will consider the original date of filing of the papers as the date of recording of the document. The certification procedure under either § 1.8 or § 1.10 of this Chapter may be used for resubmissions of returned papers to have the benefit of the date of deposit in the United States Postal Service. If the returned papers are not corrected and resubmitted within the specified period, the date of filing of the corrected papers will be considered to be the date of recording of the document. The specified period to resubmit the returned papers will not be extended.

§ 3.54 Effect of recording.

The recording of a document pursuant to § 3.11 is not a determination by the Office of the validity of the document or the effect that document has on the title to an application, a patent, or a registration. When necessary, the Office will determine what effect a document has, including whether a party has the authority to take an action in a matter pending before the Office.

§ 3.56 Conditional assignments.

Assignments which are made conditional on the performance of certain acts or events, such as the payment of money or other condition subsequent, if recorded in the Office, are regarded as absolute assignments for Office purposes until cancelled with the written consent of all parties or by the decree of a court of competent jurisdiction. The Office does not determine whether such conditions have been fulfilled.

Domestic Representative

§ 3.61 Domestic representative

If the assignee of a trademark application or registration is not domiciled in the United States, the assignee must designate, in writing to the Office, a domestic representative. An assignee of a patent application or patent may designate a domestic representative if the assignee is not residing in the United States. The designation shall state the name and address of a person residing within the United States on whom may be served process or notice of proceedings affecting the application, patent or registration or rights thereunder.

Prosecution by Assignee

§ 3.71 Prosecution by assignee.

The asignee of record of the entire right, title and interest in an application for patent is entitled to conduct the prosecution of the patent application to the exclusion of the named inventor or previous assignee. The assignee of record of the entire right, title and interest in a trademark application or registration is entitled to conduct the prosecution of the trademark application or registration to the exclusion of the original applicant or previous assignee.

§ 3.73 Establishing right of assignee to prosecute.

(a) The inventor is presumed to be the owner of a patent application, and any patent that may issue therefrom, unless there is an assignment. The original applicant is presumed to be the owner of a trademark unless there is an assignment.

(b) Any action before the Office with respect to an assigneed application, patent, or registration may be taken by the assignee of the entire right, title, and interest provided ownership is established to the satisfaction of the Commissioner. Ownership may be established by submitting to the Office documentary evidence of a chain of title from the original owner to the

assignee or by specifying (e.g., reel and frame number, etc.) where such evidence is recorded in the Office. When a party holding ownership of an application through assignment(s) seeks to take action in a matter pending before the Office, a statement, signed by the party or its attorney or agent of record, must also be submitted specifying the documents placing ownership in the party, and stating the evidence has been reviewed and certifying that, to the best of the party's, attorney's, or agent's knowledge and belief, title is in the party seeking to take the action. Documents submitted to establish ownership may be required to be recorded as a condition to permitting the requesting party to take action in a matter pending before the Office.

Issuance to Assignee

§ 3.81 Issue of patent to assignee.

(a) For a patent application, if an assignment of the entire right, title, and interest is recorded before the issue fee is paid, the patent may issue in the name of the assignee. If the assignee holds an undivided part interest, the patent may issue jointly to the inventor and the assignee. At the time the issue fee is paid, the name of the assignee must be provided if the patent is to issue solely or jointly to that assignee.

(b) If the assignment is submitted for recording after the date of payment of the issue fee, but prior to issuance of the patent, the assignee may petition that the patent issue to the assignee. Any such petition must be accompanied by the fee set forth in § 1.17(i)(1) of this Chapter.

§ 3.85 Issue of registration to assignee.

The certificate of registration may be issued to the assignee of the applicant, or in a new name of the applicant, provided that the party files a written request in the trademark application by the time the application is being prepared for issuance of the certificate of registration, and the appropriate document is recorded in the Office. If the assignment or name change document has not been recorded in the Office, then the written request must state that the document has been filed for recordation. The address of the assignee must be made of record in the application file.<

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

POSTAL SERVICE DELAY IN DELIVERY OF PTO MAIL

The United States Postal Service (USPS) has advised the Patent and Trademark Office (PTO) that delivery of mail picked up by the USPS at the PTO around March 18-19, 1991, was delayed. Delivery of that mail could have taken place as late as May 15-17, 1991.

To minimize, if not eliminate, any adverse impact caused by the USPS delay, and subject to the conditions specified in paragraph 5, the following times for taking action in response to a PTO letter involved in the delay apply.

1. If a decision of the Board of Patent Appeals and Interferences (BPAI) or the Trademark Trial and Appeal Board (TTAB), is date-stamped on any date in March 1991, and was delivered by the USPS after May 1, 1991, then the time for taking action under:

(a) 37 CFR § 1.196 (new ground of rejection);

(b) 37 CFR §§ 1.197, 1.658, 2.129, or 2.144 (seeking reconsideration); or

(c) 35 U.S.C. § 141 or § 145 or 15 U.S.C. § 1071 (seeking judicial review),

will be extended to and including Monday, July 1, 1991, unless the date for taking action is already set to expire later than July 1, 1991, in which case the later date applies. 37 CFR §§ 1.304 and 2.145.

2. If an order, decision, or other action of the BPAI or TTAB, other than those which would call for taking action under subparagraphs (a) through (c) of paragraph 1, is date-stamped on any date in March 1991, and was delivered by the USPS after May 1, 1991, then the time for taking action shall be determined by:

(1) the Chairman of the BPAI or his designee in a patent case; or

(2) the Chairman of the TTAB or his designee in a trademark case.

It is not possible, from a practical point of view, to set by general notice a date for taking action in the numerous situations which can arise in connection with most interlocutory orders, decisions, and other actions entered by the BPAI and TTAB. However, it is expected that appropriate relief will be granted on a case-by-case basis.

3. If an advisory action entered in an ex parte patent case after final rejection (see Manual of Patent Examining Procedure, § 714.13) is date-stamped on any date in March 1991, and was delivered by the USPS after May 1, 1991, and applicant can still take, and wants to take, action within the six-month period allowed by law (35 U.S.C. § 133), then the provisions of 37 CFR § 1.136(a) and (b) are waived (37 CFR § 1.183) to the extent that an extension of time under 37 CFR § 1.136(b) will be granted without a fee even though filed after the day on which action by the applicant is due. In no case can the

extension carry the date on which a response is due beyond the six-month statutory limit (35 U.S.C. § 133).

4. If a PTO paper, i.e., any ex parte rejection, ex parte refusal, decision, order, requirement, request for payment of a fee, or other similar paper (except decisions or orders of the BPAI or TTAB, which are governed by paragraph 1 and 2, or an advisory action in a patent case, which is governed by paragraph 3), is date-stamped in March 1991, and was delivered by USPS after May 1, 1991, then:

(1) the PTO paper shall be deemed to have been mailed on Monday, May 20, 1991, and

(2) any response filed within the time period as reset by this notice will be deemed to be timely filed.

5. To receive the benefits set out in paragraphs 1 through 4 for a paper being submitted, a written request for appropriate relief must be filed with, and preferably as part of, the paper. The written request (1) must make reference to this notice, and (2) must include a statement signed by a practitioner, as defined in 37 CFR § 10.1(r), which identifies the PTO paper with reasonable particularity and states that the PTO paper being responded to:

(a) has been reviewed;

(b) bears a PTO date stamp having a date in March 1991, specifying the date of the PTO date stamp on the paper; and

(c) was received after May 1, 1991, specifying the date the paper was received.

A copy of the page of the PTO paper bearing the PTO date stamp and a date-stamp, or other indication, showing receipt of the paper should be attached to and made a part of the statement. For example, an appropriate statement is:

> I, _____, an attorney (agent) of record in the above-identified proceeding before the Patent and Trademark Office, have reviewed the following paper: (identify the paper, i.e., the decision of the BPAI, the decision of the TTAB, the first Office action, the final refusal, etc.). The paper has a PTO date stamp of March __, 1991, and was received on May __, 1991. A copy of the page of the paper showing the PTO date stamp and a date stamp showing receipt of the paper is attached.

6. It is not possible to extend times set by statutes which leave the Commissioner no discretion to extend times, e.g., (1) responding to an ex parte patent rejection (35 U.S.C. § 133) or an ex parte trademark refusal (15 U.S.C. § 1062) after expiration of the six-month statutory period; (2) supplementing certain affidavits of continued use under 15 U.S.C. § 1058 [(In re Mother Tucker's Food Experience (Canada), Inc., 925 F.2d 1402, 17 USPQ2d 1795 (Fed. Cir. 1991); In re Culligan International Co., 915 F.2d 680, 16 USPQ2d 1234

(Fed. Cir. 1990)]. Nevertheless, it is the intent of this notice to indicate that PTO intends to grant relief, where possible, to alleviate any hardship caused by the mail delay which occurred in this particular situation.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

New Numbers for Filing of Certain Trademark Papers and Authorizations to Charge Deposit Accounts by Facsimile Transmission

On February 12, 1991, the Trademark Examining Operation (TMEO) and the Office of the Assistant Commissioner for Trademarks implemented a pilot program to study the feasibility of accepting certain trademark documents by facsimile transmission (fax). See the *Trademark Official Gazette* notice at 1123 TMOG 18 (Feb. 12, 1991) regarding documents which may now be filed by fax transmission, documents which are excluded from fax transmission and the requirements for filing by fax in connection with this program.

The fax number for transmitting documents to the TMEO has changed. For the purpose of accepting documents which are permitted to be filed by fax with the TMEO, three fax machines are now located in the Trademark Services Division of the Office. Their fax numbers are as follows:

(703) 308-9096
(703) 308-9097
(703) 308-9098

The fax machines in the Trademark Services Division are the only machines in the Trademark Examining Operation designated for the aceceptance of documents which are permitted to be filed by fax. Therefore, in order to file relevant documents by fax with the TMEO, one of the above numbers must be used.

The fax number for the Office of the Assistant Commissioner for Trademarks, (703) 557-8263, is unchanged.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

Error in *Code of Federal Regulations* (C. F. R.) Rule 1.8, 37 C. F. R. 1.8

The following C. F. R. Correction appeared in the *Federal Register*, at 56 FR 14648, on April 11, 1991:

In the July 1, 1990 revision of title 37 of the Code of Federal Regulations, on page 14, column two, § 1.8, paragraphs (a)(2)(xiv), (xv), and (xvi) were inadvertently placed after paragraph (b). These paragraphs should be correctly placed after paragraph (a)(2)(xiii) and before paragraph (b), in column one.

Rule 1.8 (37 C. F. R. § 1.8), which is entitled "Certificate of Mailing," sets out the conditions for the timely filing by first-class mail of papers utilizing the Certificate of Mailing procedure. Under Rule 1.8(a)(2), certain papers are excluded from the Certificate of Mailing procedure and will not be considered timely filed if received after the due date, unless deposited as Express Mail in compliance with Rule 1.10 (37 C. F. R. § 1.10). There are sixteen (16) exclusions, numbered 1.8(a)(2)(i) through (xvi). However, the list of exclusions, as printed in the July 1, 1990 revision of the C. F. R., is interrupted at 1.8(a)(2) (xiii) by paragraph 1.8(b), before it resumes with 1.8(a)(2)(xiv) through (xvi). Therefore, at first glance, it appears that there are only thirteen (13) exclusions. The exclusions for statements of use under Rule 2.88; extension requests under Rule 2.89 for filing a statement of use; and amendments to allege use in commerce under Rule 2.76 were inadvertently placed after paragraph (b).

Any appicant who relied to its detriment on the July 1, 1990 revision of the C. F. R. and utilized a Rule 1.8 Certificate of Mailing when filing either a statement of use or an extension request for filing a statement of use, resulting in abandonment of the application, may petition the Commissioner to revive its application. Further, any applicant who filed an amendment to allege use and relied to its detriment on the July 1, 1990 revision to the C. F. R., resulting in its amendment to allege use being considered untimely, may also petition the Commissioner for relief.

Pursuant to Rules 2.66 and 2.146(c), applicant must support its statement of detrimental reliance with an affidavit or declaration in accordance with Rule 2.20, averring that on a specific date between July 1, 1990 and the date of publication of this notice in the *Official Gazette*, petitioner filed one of the three relevant documents pursuant to Rule 1.8; relied on the 1990 revision of the C. F. R.; and believed that the relevant document was not excluded from filing under Rule 1.8 the petition fee is $100 per application. Rule 2.6(k).

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
